

# 13th International Conference on Cultivation Technique and Phytopathological Problems in Organic Fruit-Growing

Weinsberg (Germany) February 18 to 20, 2008

## Call for papers

This conference represents a continuation of twelve previous meetings. It is intended to bring together European researchers working on topics interesting for organic fruit growing and consultants involved in organic fruit growing to discuss the latest results with regard to the improvement of the production system of organic fruit growing.

### Main topics are

- Disease Control
- Fruit quality and storage treatments
- Soil management
- Stone fruit
- Small fruit
- Pest control
- Crop regulation
- Cultivars
- Sustainability
- Economy

### Contributions

Contributions are invited as papers or posters on topics of interest to organic fruit growing. Contributions must be written in English. All contributions will be reviewed prior to acceptance.

### Official language

The official language will be English.

### Proceedings

The proceedings will be handed out to participants at the conference. Contributions must be written in English language.
